CHINESE LANGUAGE TRAINING

Our Chinese Studies programme is primarily taught in English: no knowledge of Chinese is required for admission.

The programme has two streams:

Students in the **International Stream** can opt to receive intensive training in Mandarin Chinese (Putonghua).

Students in the **Chinese Native Speaker Stream** will be trained in academic reading, writing and presenting in English, elevating their research and communication skills.

EXPERIENTIAL LEARNING & EXCHANGE OPPORTUNITIES

As a crucial part of the programme, our teachers and teaching assistants will lead students to explore local societies and cultures. Our experiential learning courses introduce students to business, education, non-governmental organizations, popular culture, etc. In these courses, students get intensive training in communication and analytical abilities in real-life situations. In addition, our students can apply to CCS's and University's many exchange programmes to spend time at academic institutions in China or overseas.
